Letter of reference for Drew Huynh

I met Drew in 2003 when we were setting up our company and needed some help with phone system wiring and installation. Even though I had ordered a system from another company who could not provide service, Drew was willing and able to assist with the wiring and also with the configuration of the new system.

Since that time Drew has helped through two expansions as we have grown out of two buildings over the last five years. He has proven to be knowledgeable and helpful and has advised us and solved problems for us many times over the years.

I am happy to write a recommendation for him and wish him well as he expands his business.
